Whole-House Energy Retrofit = **High-Efficiency Retrofit**

**Technical Description:**

A high-efficiency retrofit is a home renovation or upgrade that results in an energy efficiency level that is at least 15% greater than the home's, or similar homes', historic energy consumption.

**Alternate Terms**

- Enhanced Comfort Retrofit
- Enhanced Health Home Retrofit
- Advanced Energy Retrofit Technology
- Professionally-Installed Energy Retrofit
- Enhanced Durability Energy Retrofit

**High-Efficiency Retrofit Sales Message**

High-efficiency retrofits are homes with significant energy efficiency improvements that also improve comfort, health, safety, and durability. What this means to you is a better living experience along with lower utility bills. Wouldn't you agree this is a great opportunity to upgrade existing homes?
